

Image Facts Sheet

Project #2

Name: _____

Due Date: _____

Filename: **tower.jpg**

Overview: Crop image as desired. Lighten image and change the brightness and contrast to your liking recording the setting in the space identified below. Use the Dodging tool where necessary. Convert the image to grayscale and apply an interesting filter. Add a border along with your first and last name to the image. Save the results in a .gif file format using a transparent background and print it using a 4-inch width.

For complete credit attach the final image to this facts sheet and record of the settings you used for the following image elements:

1. Crop - use pixels as measurement unit

NOTE: Record coordinates before cropping since new coordinates are established after area is copied to new image window.

- Top/Left coordinates:
- Bottom/Right coordinates:

2. Input level:

3. Brightness change:

4. Contrast change:

5. Border width in pixels:

6. Text

- Font Family:
- Font Size:

7. Filter:

8. Briefly describe the area(s) you dodged:
